SD421
U683
1954

This is a compilation of forest fire statistics covering the Calendar Year 1954 as reported to the United States Forest Service by its field offices, cooperating States, the Department of the Interior, and the Tennessee Valley Authority.

The figures are shown separately by the individual States reporting and totals are also given for certain geographical groups of States. The tabulation is prepared in the following sections:

SUMMARY OF FOREST FIRE STATISTICS FOR 1954
Areas needing protection; areas protected and unprotected; number of fires and area burned on both protected and unprotected forest lands (Pages 1 to 4).

NUMBER OF FOREST FIRES BY CAUSE AND SIZE
For protected areas only (Pages 5 to 8).

AREAS BURNED
For protected areas only (Pages 9 to 12).

The statistics shown are the most reliable information which State and Federal protection agencies were able to obtain.

Since no field organizations are available in unprotected areas to report fires, the statistics on such unprotected areas are merely the best estimates by the States. No estimates were obtained for State and private lands in Arizona, Nebraska, Kansas, North Dakota, and Wyoming.

SUMMARY OF 1954 WEATHER AND FIRE SITUATIONS

Region 1 - Comprising Montana and Idaho

Season rather light with lightning activity below normal.

Region 2 - Comprising Colorado, Kansas, Nebraska, South Dakota and Wyoming

Drought conditions existed in Colorado, but South Dakota had a relatively light season.

Region 3 - Comprising Arizona and New Mexico

Season was one of the most hazardous on record.

Region 4 - Comprising Utah, Nevada, Idaho and Western Wyoming

June, July and August were very dry, but during the critical period there were few lightning storms.

Region 5 - Comprising California and Hawaii

Season dry and warm early in the year, but changed to rainy and cool later in the season. There were fewer lightning fires than in 1953.

Region 6 - Comprising Oregon and Washington

Slightly more severe season than 1953, but both years were lighter than normal.

Region 7 - Comprising Connecticut, Delaware, Kentucky, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia and West Virginia

Season throughout the greater part of the Region was favorable for low fire occurrence. The weather record was unusual in the occurrence of three hurricanes.

Region 8 - Comprising Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee and Texas

Continued drought conditions resulted in an almost yearlong fire season. Many counties throughout the Region were certified for drought relief.

Region 9 - Comprising Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, North Dakota, Ohio and Wisconsin

Though this was the third successive year of high temperatures, below normal precipitation, and drying winds, the fire record for the Region was better than average.
